SUMMARY

Experienced and results-driven Software Engineer with over 5 years of hands-on experience designing and building scalable backend systems using C#, .NET, and modern development practices. Specializing in secure RESTful APIs, microservices architecture, and enterprise-grade fintech and banking solutions. Proven expertise in role-based access control (RBAC), event management systems, secure transaction workflows, and admin dashboards with audit and approval capabilities. Passionate about clean code, automation, and backend performance, with a strong focus on delivering maintainable, high-quality software from planning through deployment.

WORK EXPERIENCE

Jan 2024 - Present

Software Engineer, Cavista (Axxess US)

Developed and maintained scalable backend services using C# and ASP.NET Core, supporting business-critical features for healthcare and enterprise applications. Designed and implemented

- RESTful APIs to facilitate secure and efficient communication between microservices and external systems. Collaborated with cross-functional teams to integrate third-party services,
- implement business logic, and ensure seamless user experiences. Applied SOLID principles, design patterns, and domain-driven design (DDD) to enhance maintainability and reduce
- technical debt. Worked on performance optimization, SQL query tuning, and system monitoring to ensure high availability and reliability of services. **Stack : C#, .Net , Api , Domain-Driven**
- **Design (DDD), CQRS, Jira, Kubernetes**

Software Engineer, Sterling Bank PLC (Remote)

April 2022 - February 2024

- Designed and implemented secure backendsystemsforcore bankingand digitalfinancial services using C# and ASP.NET Core.
- Built and maintained RESTful APIs for customer onboarding, transaction processing, and account management, ensuring scalability and compliance with industry standards.
- Led the development of RBAC (Role-Based Access Control) modules and internal tools for regulatory reporting and workflow automation.
- Collaborated with DevOps and QA teams to ensure CI/CD pipelines, code quality, and system reliability for production-grade applications.
- Collaborated with DevOps and QA teams to ensure CI/CD pipelines, code quality, and system reliability for production-grade applications.
- Improved performance of critical services through SQL optimization, code refactoring, and caching strategies.

Software Engineer, Turing US (Google)

September 2020- April 2022

- Engineered intelligentbackend systems usingC# and .NET, integrating AI/ML capabilities into enterprise-grade applications for global clients.
- Developed and deployed machine learning models for predictive analytics, recommendation systems, and intelligent automation using tools like scikit-learn, TensorFlow, and ML.NET.
- Implemented data preprocessing pipelines, model evaluation, and monitoring to ensure accuracy, reliability, and fairness of deployed models.
- Ensured performance optimization, code quality, and system robustness while balancing AI innovation with business requirements.

EDUCATION

Bachelor of Science (BSc) in Computer Science

National Open University of Nigeria

- **Enhancing Technical Expertise:** Pursuing a degree that deepens my understanding of software development, algorithms, and systems architecture, directly contributing to my ability to deliver cutting-edge solutions in my professional work.
- **Up-to-Date Industry Knowledge:** Gaining exposure to the latest advancements in computer science, which keeps me ahead in adopting new technologies and methodologies in real-world projects.

CERTIFICATION

May 2014 - May 2016

- C# for .NET Developers (Coursera)

<https://drive.google.com/file/d/16jEWdSnuNmlA000IfmpVE7OF3O3Nlolg/view?usp=sharing>

- Backend Development using ASP.Net (Coursera)

<https://drive.google.com/file/d/1qmmwzzewtJqOy4ihIXGOxZyJfYuReKdy/view?usp=sharing>

ADDITIONAL INFORMATION

- **Skills:** Programming, Product development, Testing and debugging, Critical Thinking, Web Application, Technical support, Architectural development, Code versioning, API design knowledge, Deployment.
- **Technical Skills:** C# , ASP.NET Core / ASP.NET MVC, Entity Framework / EF Core, Domain-Driven Design (DDD), Microservices Architecture, Design Patterns (Repository, Unit of Work, Factory), Azure (App Services, DevOps Pipelines), Dockerized Deployments.
- **Tools:** Visual Studio Code, Visual Studio, Git, My SQL, SQL Server, JIRA, AZURE.
- **Languages:** English.
